The project described in this application will meet the metering requirements of PUC 2506 including:
Electricity generation in megawatt hours shall be reported to the GIS quarterly with a
statement that the submission is accurate by the owner of the source, the independent
monitor or a designated representative.
A revenue quality meter is used to measure the electricity generated.

The facility owner has certified to the independent monitor that the meter operates according to manufacturing standards.

The meter shall be maintained according to the manufacturer's recommendations.

The project is installed and operating in conformance with applicable building codes.

A copy of the facility's interconnection agreement is attached.

## EVERSOURCE – NEW HAMPSHIRE INTERCONNECTION STANDARDS FOR INVERTERS SIZED UP TO 100 KVA

#### Terms and Conditions for Simplified Process Interconnections

Company waives inspection/Witness Test: Yes No	Date of inspection/Witness Test:

- Construction of the Facility. The Interconnecting Customer may proceed to construct the Facility in compliance with the specifications of its
  Application once the Approval to Install the Facility has been signed by the Company. Such Approval relates only to the Eversource and Puc
  900 electrical interconnection requirements, and does not convey any permissions or rights associated with permits, code enforcement,
  easements, rights of way, set back, or other physical contrutruction issues.
- Interconnection and operation. The Interconnecting Customer may operate Facility and interconnect with the Company's system once the all
  of the following has occurred:
  - 2.1. Municipal Inspection. Upon completing construction, the Interconnecting Customer will cause the Facility to be inspected or otherwise certified by the local electrical wiring inspector with jurisdiction.
  - 2.2. Certificate of Completion. The Interconnecting Customer returns the Certificate of Completion to the Agreement to the Company at address noted.
  - 2.3. Company has completed or waived the right to inspection.
- 3. Company Right of Inspection. The Company will make every attempt within ten (10) business days after receipt of the Certificate of Completion, and upon reasonable notice and at a mutually convenient time, conduct an inspection of the Facility to ensure that all equipment has been appropriately installed and that all electrical connections have been made in accordance with the Interconnection Standard. The Company has the right to disconnect the Facility in the event of improper installation or failure to return Certificate of Completion. All projects larger than 10 kVA will be writness tested, unless waived by the Company.
- A. Safe Operations and Maintenance. The Interconnecting Customer shall be fully responsible to operate, maintain, and repair the Facility.
- 5. Disconnection. The Company may temporarily disconnect the Facility to facilitate planned or emergency Company work.
- 6. Metering and Billing. All renewable Pacilities approved under this Agreement that qualify for net metering, as approved by the Commission from time to time, and the following is necessary to implement the net metering provisions:
  - 6.1. Interconnecting Customer Provides: The Interconnecting Customer shall furnish and install, if not already in place, the necessary meter socket and wiring in accordance with accepted electrical standards. In some cases the Interconnecting Customer may be required to install a separate telephone line.
  - 6.2. Company Installs Meter. The Company will make every attempt to furnish and install a meter capable of net metering within ten (10) business days after receipt of the Certificate of Completion if inspection is waived, or within 10 business days after the inspection is completed, if such meter is not already in place.
- 7 Indemnification. Interconnecting Customer and Company shall each indemnify, defend and hold the other, its directors, officers, amployees and agents (including, but not limited to, Affiliates and contractors and their employees), harmless from and against all liabilities, damages, losses, penalties, claims, demands, suits and proceedings of any nature whatsoever for personal injury (including death) or property damages to unaffiliated third parties that arise out of, or are in any manner connected with, the performance of this Agreement by that party, except to the extent that such injury or damages to unaffiliated third parties may be attributable to the negligence or willful misconduct of the party seeking indemnification.
- 8. Limitation of Liability. Each party's liability to the other party-for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act of omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either party be liable to the other party for any indirect, incidental, special, consequential, or punitive damages of any kind whatsoever.
- 9. Termination. This Agreement may be terminated under the following conditions:
  - 9.1. By Mutual Agreement, The Parties agree in writing to terminate the Agreement.
  - 9.2. By Interconnecting Customer. The Interconnecting Customer may terminate this Agreement by providing written notice to Company.
  - 9.3. By Company. The Company may terminate this Agreement (1) if the Facility fails to operate for any consecutive 12 month period, or (2) in the event that the Facility impairs or, in the good faith judgment of the Company, may imminently impair the operation of the electric distribution system or service to other customers or materially impairs the local circuit and the Interconnecting Customer does not cure the impairment.
- 10. Assignment/Transfer of Ownership of the Facility. This Agreement shall survive the transfer of ownership of the Facility to a new owner when the new owner agrees in writing to comply with the terms of this Agreement and so notifies the Company.
- 11. Interconnection Standard. These Terms and Conditions are pursuant to the Company's "Interconnection Standards for Inverters Sized Up to 100 kVA" for the Interconnection of Customer-Owned Generating Facilities, as approved by the Commission and as the same may be amended from time to time ("Interconnection Standard"). All defined terms set forth in these Terms and Conditions are as defined in the Interconnection Standard (see Company's website for the complete document).

## #N4739 Whalen PV - Application Temporarily Denied

From: DG < > < >

To: nmross6632 Sent by: Michael D. Motta

Cc: "Justin Thomas"

12/16/2015 10:06 AM

Dear Ms. Whalen,

Project #N4739 Whalen PV located at 480 Bradford Road in Newport, NH is TEMPORARILY DENIED. The project capacity (10.56 kW) exceeds the rating of the transformer that serves this property (10 kVA). Your options are 1) reduce the project capacity or 2) request the Eversource equipment upgrades necessary to facilitate this interconnection.

For option 1) please reply to the email with a revised application and related documentation

For option 2) Eversource will initiate a Work Request on your behalf for a transformer upgrade. Once the Work Request has been initiated an Eversource Field Technician will contact you to discuss the scope of your project In addition to requiring a higher rated transformer, it is possible that the pole, the secondary service wires, and/or other Eversource equipment will also need to be upgraded to enable your project. These issues will be addressed by the Field Technician. Please remember all costs associate with any required Eversource upgrades shall be borne by the customer and/or developer. You will be provided with a written cost estimate prior to any work being performed

To initiate this review, please call Mike Motta at 1-603-634-2920 and ask him to initiate a Distributed Generation Work Request. Please reference your project number #N4739 Whalen PV. After the Work Request has been initiated, Eversource will issue a "conditional approval" for your project.

If we do not receive either a revised application (option 1) or your telephone call to initiate a Work Request (option 2) within 15 business days, your application will be terminated and you will need to re-apply for further consideration.

Please do not hesitate to call me directly should you have any questions or require additional information

Regards,

Michael D. Motta Senior Engineer, Eversource NH Distributed Generation 780 North Commercial Street Manchester, NH 03105 Office: 603.634.2920

Fax: 603.634.2924

#### New Hampshire PHC REC Certification Application Owner Statements

The information provided on this application for New Hampshire Romowable Energy Certificate eligibility is accurate to the first of my knowledge and Lauthurice Knokhwood Energy to act on my behalf in filing and application.

The project described in this application will meet the metering requirements of PBC 250 $\alpha$  including.

Finetricity generation in magnitude thours shall be reported to the GIS quarterly with a statement that the submission is accurate by the towner of the source, the independent monitor, or a designated representative.

A revenue quality meter is used to measure the electricity generated.

The facility owner has certified to the independent monitor that the coefer operates according to monufacturing standards.

The motor shall be maintained according to the manufacturer's recommendations

The project is installed and operating in conformance with applicable building rodes
